

To the Editor,

Technology is everywhere these days, right?

Not for everyone. Luckily for Stark County we have access to technology like computers, Wi-Fi, printing and scanning through Stark Library. This technology connects us to the rest of the world. It allows us to build communities, earn skills and feel like part of something bigger.

For older adults this is especially true. Technology gives them a feeling of connection whether it be to family members or friends. Many older adults would not have access to computers or the internet without the resources provided by Stark Library.

Those seeking jobs often don't have access to Wi-Fi or the technology required to apply for jobs or earn new skills and certifications. These individuals are working hard to contribute to their community and earn a living. They deserve access to these resources.

Stark Library would not be able to continue providing these services without Issue 4. If Issue 4 fails to pass, Stark Library would have to reduce their hours, restricting access to technology and ultimately depriving community members of connection and growth.

A levy renewal with a modest increase is a small ask when you consider

Please consider voting FOR Issue 4 on the November ballot.

Sincerely,

 **VOTE FOR
ISSUE 4**
